About Us

Dimension Fitness specialises in creating customised functional fitness equipment. With over a decade of experience servicing the UAE and Middle East for home, commercial and Government fitness facilities, our Dubai based production facility has the ability to deliver on almost any bespoke requirements you may have.

We invite you to view our standard product range and see how we can help you customise your equipment for your space and training requirements.

How we work

1. Design as per site

We take the time to understand the intricacies of your particular site and your unique requirements from the space.

We use your space measurements, photos and wish-list to develop your ideal product or layout.

2. Present 3D Design

Once we know what you need, we put it all into 3D mock up design so we can visualise and play around with the space together.

3D is a far more effective tool in understanding spaces than a 2 dimensional drawing.

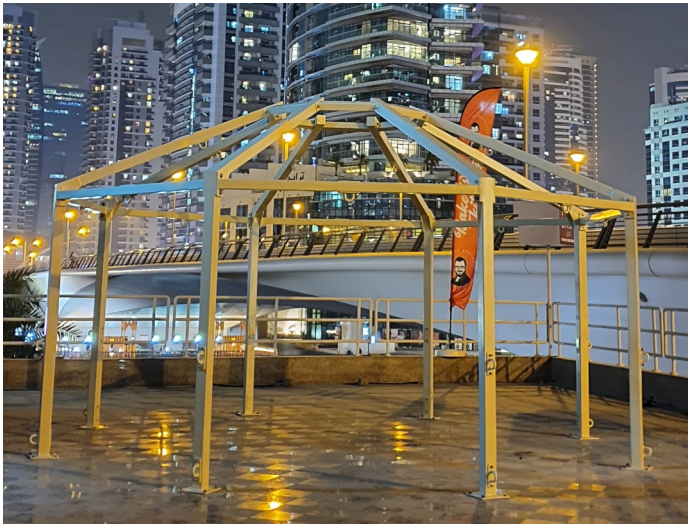

3. Deliver & Install

Within a couple of weeks, you will have your custom fitness product or space manufactured, delivered and installed!

Customise it!

Our strength lies in our ability to customise products for the specific needs of the customer. Be it for a home, commercial gym, or something for the kids to play on—Dimension Fitness will be able to help you build the perfect solution. Below are a few examples of our bespoke work. We look forward to working with you on your next project!

Obstacle Courses

We do completely custom designed obstacle courses for various levels of athletes. Our clients include the **UAE Presidential Guard**, **UAE Ministry of Defence** and the **Abu Dhabi Police**. After taking the client's brief of the challenges and movements they are looking to train, we set out to design bespoke obstacles and courses for their needs.

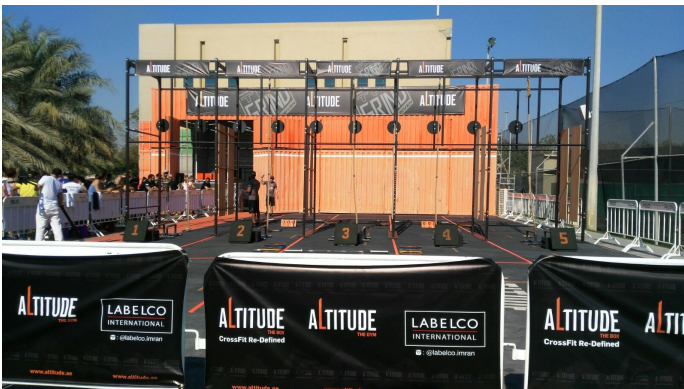

Get in touch to have us help you design your obstacle course!
